11-Module Unified Navigation Sequence

CORE-02 Precedence Rule: Mandated navigation flow enforced across **Reception, Doctor & Admin** user roles. Every login flows through this unified sequence before accessing specialized dashboards.

11	3	1	87
CORE MODULES	USER ROLES	UNIFIED FLOW	FUNCTIONAL RULES

Receptionist Role

Front-Office Staff

- ✓ Primary dashboard for patient intake
- ✓ Full access to all 11 modules
- ✓ Can create bookings, view calendars
- ✓ Track KPIs (Calls, Collections, IG, Reviews)
- ✓ Initiate follow-up calls & collection tracking
- ✓ Access to Billing/Accounts register

Doctor Role

Clinical Staff

- ✓ Dental specialists (Orthodontics, General)
- ✓ Mark procedures In Progress/Completed
- ✓ Access Professional Video Library
- ✓ Set Treatment Plans by Favorite Patients
- ✓ Trigger Feedback Call Tracker automatically
- ✓ Coordinate with Dental Lab via chat
- ✓ Track insurance claims & approvals

👨‍💼 Admin Role

Management & Housekeeping

- ✓ Review & approve all KPI tracker entries
- ✓ Assign tasks (Daily/Weekly/Monthly)
- ✓ Monitor daily operations & scheduling
- ✓ Manage branch schedules & doctor rosters
- ✓ Approve or reject Hold = marks pending review
- ✓ View Patient Journey compliance status
- ✓ Override 24h editing lock with proper justification

Full Navigation Sequence with Module Features

1. 🏠 **Dashboard (Default)**
   6 KPI Card Hub with target tracking & daily tasks
2. 🗓️ **Calendar**

Multi-doctor scheduler with 20 live counters & WhatsApp send

3

🔍 MSD Leakage Tracker

7 specialized unbooked patient cohort cards

4

⚠️ Fail Visit Tracker

Yesterday rollover & 10 outcome filters for no-show recovery

5

🦷 Ortho Continuity Tracker

Running braces management & 7-month aging buckets

6

📋 Treatment Plan Tracker

3-rule active filter, favorite patients, tooth-level recall

7

📞 Feedback Call Tracker

Auto-trigger post-procedures, dual-lane comments

8

🔬 Dental Lab Workflow

3-zone shade master, 3-lane chat, external lab link

9

🛡️ Insurance Tracker

Globemed/Mednet formats, deductible engine, 6 claim attachments

10

🏥 Patient Journey

24-column compliance matrix with tablet e-consent

11

💳 Billing & Accounts

Reception Cashier Register, Collection Auto-Sync, Shift Printout

Feature-Packed Modules

2

Calendar (20 Counters)

Scheduled, Pre-Confirmed, Confirmed, Coming, Arrived, In Room, No Ans 1/2, Fail Visit, etc. + 4 patient counters

3

MSD (7 Cohorts)

In Progress Dental, In Progress Ortho, Decided Plan Dental, Decided Plan Ortho, Balance Payment Dental, Balance Payment Ortho, Completed With TP Ortho

4

Fail Visit (10 Filters)

Schedule, No Ans 1/2/3, Remind Later, Cancelled, SMS/WhatsApp, Outside, Not Aware TP, plus deduplication & booking lock

5

Ortho (5 Categories)

Total Running PT breakdown (Special, Normal, Invisalign, Illusion, Outside) + Today/Until Review counters

6

TP (7 Recall Cohorts)

6-month Scaling, 2-month GBT, 6-month Whitening, Extraction w/o Implant, RCT w/o Crown, Ortho, Implant

Role-Specific Access Scope

1, 2, 6, 11

Unified Admin Access

Dashboard (KPI approval), Calendar (doctor roster merging), TP (favorite patients), Billing (shift verification)

3, 4, 5

Clinical Data Entry

MSD (mark dental/ortho as In Progress), Fail Visit (mark no-show outcomes), Ortho (assign running PT to doctor)

7, 8, 9

Patient Engagement

Feedback (add comments after completion), Lab (coordinate distinct Technician lane), Insurance (submit finalize claim)

10

Quality Endpoint

Patient Journey acts as governance board for all 17 compliance checkpoints, flagging missing consents/photos/agreements

Navigation Length

Maximum 11 pages to cycle through before specialized module views open. After Dashboard, all other modules are accessed via sub-navigation or quick-filter panels within each module.

Mandatory Precedence

CORE-02 supersedes all navigation rules. Users cannot bypass steps or skip modules. The blueprint explicitly validates each flow point before deliverable acceptance.

Parallel Workflow

While all three roles navigate the same sequence, each stage supports unique context: Reception books → Doctor marks progress → Admin approves → Billing closes → Feedback triggers

Session Management

24-hour audit lock on Hold-marked records (DASH-12). Admin oversight overrides allowed only with justification. Daily sign-off handles dual logins at shift change.

Quick Surface Hooks

Horizontal quick-filter tabs at top of each module: *All Patients / Calendar Today / Patients Need Contact / Dentist's Favorite TP* keep specialist views one-click away.

Offline Capability

Navigation sequence supports fully offline operation. SQLite caches all module views; RabbitMQ syncs updates when connection restored. No lost context across internet drops.
